# Will Post Quantum Cryptography Change our Life?

Pierre-Yvan Liardet<sup>\*1</sup>

<sup>1</sup>eShard – eShard [Pessac] – France

## Résumé

The NIST is running a standardization process to evolve to Post Quantum Cryptography to anticipate the arrival of power enough quantum computer to break our today favorite public key algorithms. In this talk, I will give some perspectives on the potential impact of this change on the life of people working in the area of hardware attacks.
